PREFACE

CASSELL'S popular Compact Dictionary was first published in April 1904 as a careful abridgment, prepared by M. de V. Payen-Payne, of Cassell's New French Dictionary. Since then, while passing through more than thirty editions, it has been continually revised and brought up to date, making it (within the limits of its size) a thoroughly reliable work of reference. The present text has been entirely reset and undergone a further extensive revision by Alfred de Curzon, B. ès L.

In the French-English section of this Dictionary phonetic symbols are used to indicate the correct pronunciation of each word, and a full key to these symbols will be found on p. vii. The script designed by the International Phonetic Association has been adopted, as best suited for common use and the most frequently employed.

In the English-French section a simplified transcription has been adopted to serve the needs of French students.

EXPLANATION OF THE SIGNS USED IN THIS WORK

FRENCH-ENGLISH SECTION

- Indicates the repetition of the same word.
- (—) Indicates the plural of foreign and compound nouns when it is like the singular.
- (—s) Indicates the plural of foreign nouns when it is formed by adding *s*.
- When the plural of foreign and compound nouns is formed by changing the final letter or letters, the whole plural form is given. Thus, *e.g.* (*Lazaroni*), plural of *Lazarone*; (— *-amiraux*), plural of — *-amiral*.
- (—s- —s), or (—s- —x), or (—x- —x), or (—x- —s) Indicate the plural of compound nouns when it is formed by adding *s* or *x* to each component.
- (—s- —) or (—x- —) Indicate the plural of compound nouns when it is formed by adding *s* or *x* to the first component only.
- (— - —s) or (— - —x) Indicate the plural of compound nouns when it is formed by adding *s* or *x* to the second component only.
- (n.s.) Indicates foreign and compound nouns not used in the singular.
- (n.p.) Indicates foreign and compound nouns not used in the plural.
- Before final letters, points out the masculine termination, which is to be changed in the feminine; as, *acti-f*, -*ve*, *actif*, active; *act-eur*, -*rice*, *acteur*, *actrice*; *honteux*, -*se*, *honteux*, *honteuse*.
- When two or more French nouns of the same gender follow, their gender is indicated after the last noun only.
- Words in parentheses serve to complete the sense of those words that precede or follow them; or they refer to the object with which they are connected, or indicate the art, trade, profession, etc., to which they relate.
- * In the phonetic spelling, indicates that the stress falls on the following syllable.

ENGLISH-FRENCH SECTION

- Those English words of which the pronunciation is quite irregular are noticed in full; but those that are only partly irregular are noticed in their irregularities only.
- The pronunciation of English words is indicated, in the English-French Division, by means of the French spelling, with the exception of:
 - th* hard, which is expressed by (th);
 - th* soft, " " (th);
 - g*, when hard before *e*, *i*, or *v*, by (gh).
- The long sound of the English vowels is designated by a horizontal mark over the vowel, thus: *ā*, *ē*, *ī*, *ō*, *ū*.
- The short sound of the English vowels is designated by a curved mark, thus: *ā*, *ē*, *ī*, *ō*, *ū*. This mark seldom occurs but over the unaccented *e*. When there is no mark over the other vowels, they may be considered as natural; that is, as neither long nor short.
- Indicates the repetition of the same word.
- (ant.) Indicates obsolete English words.
